## SPACE TECH EXPO 2022

May 23 - 25, 2022 // Long Beach, California, USA

ITA - Italian Trade Agency is the Governmental agency that supports the business development of our companies abroad and promotes the attraction of foreign investment in Italy.

With a motivated and modern organization and a widespread network of overseas offices, ITA provides information, assistance, consulting, promotion and training to Italian small and medium-sized businesses. Using the most modern multi-channel promotion and communication tools, it acts to assert the excellence of Made in Italy in the world.

Through its Houston office, the Italian Trade Agency supports the aerospace sector in the United States.

**Agenzia Spaziale Italiana**

ASI was founded in 1988. Its purpose was to coordinate all of Italy's efforts and investments in the space sector. ASI is one of the most significant players in the world in space science, satellite technologies and the development of mobile systems for exploring the Universe. ASI participates in many scientific missions. While one of ASI's most important programs is the Cosmo-SkyMed, ASI also holds leadership in the European Vega program.

Italy is one of the largest manufacturing countries in the world. While there is no need to note its prominence in the sectors of fashion, food products, automotive, etc. – maybe there is still a lot more to discover about Italy’s role in Space.

The Italian aerospace industry plays a leading role in both the national and international economy. Space is one of the high-tech sectors in which Italy holds a global leadership position, ranking fourth in Europe and seventh worldwide.

Aerospace activities carried out in Italy generate 13 billion euros in revenues and employ more than 64,000 people.

Italy belongs to the exclusive club of spacefaring nations in the world that have a complete supply chain and a full range of expertise in the field. With an exceptionally articulated industrial value chain, the Italian Space Industry offers virtually everything: large System Integrators and large companies specializing in complex system integration, about 200 small and medium-sized companies engaged in upstream and downstream activities, start-ups able to innovate and stay ahead of new technology trends. Not to mention 12 Technology Clusters.

Prior to participating at Space Tech Expo USA 2022, the Italian Trade Agency has been present at the following shows and conferences this year to promote innovative Italian players in the field of aerospace: SpaceCom (Orland, FL) Space Symposium (Colorado Springs, CO), and ADSS (Seattle, WA).

While Long Beach will be our final trade show with exhibiting companies of 2022, we assure you that this is only the beginning of the “There is a Lot of Space in Italy” campaign. The campaign will blaze on via our social media channels, newsletters, and landing page, where you can keep up with the latest developments in modern Italian aerospace! Scan the QR code below to stay in the loop beyond Space Tech.

**Find, trace and discover your next Italian aerospace partner by downloading the complete industry catalog [here](#).**

Caracol offers extreme, Additive Manufacturing, solutions with no scale limits to companies in the most advanced sectors. Caracol has developed an integrated and flexible Additive Manufacturing cluster for production of large-scale advanced components with no limits in size, shape, or material. This system was conceived to manufacture parts on-demand, with composites and techno polymers, in delocalized sites, with a closed-circuit logic. The system is the ideal turnkey solution to produce several medium to large-scale parts: structural elements, metal replacement, tooling (e.g., jigs for positioning, drilling, and cutting, molds, assembly rigs, beams), prototypes, substitute parts temporarily or permanently, and many applications and components. Caracol accompanies clients throughout the production process, supporting them by facilitating their getting to know Additive Manufacturing and its opportunities from design, engineering to production. Caracol aims to reshape production systems, enabling manufacturing companies to make their way towards a more efficient, progressive, and sustainable future.

Connex Italiana was founded in 1979 with the aim to propose and to design-in electrical and electromechanical components to main Italian OEM customers. Our main markets are Aerospace & Defense, Racing, Railways and Space. We are a Manufacturer's Representative company, continually seeking to represent new innovative companies, for the Italian market and we are also a worldwide specialized distributor/service provider with thousands of items available in stock. We are looking for companies interested to explore the Italian markets and we are looking for to sell products worldwide as a distributor AS9120B qualified.

DAVI Plate and Angle Rolls are able to roll every kind of component used in the Aerospace Industry: whatever the material, the dimension and the bending radius requested, DAVI range presents an optimal alternative to offer to the customer. Whether we are talking about building parts of capsules, nacelles or boosters, in different materials (any type of steel, aluminum, titanium or other alloys), DAVI can supply the ideal solution, through both standard machines and products deeply customized, that are granted by a Research & Development Division that is in constant growth and evolution. In fact, a dedicated team of Engineers and Technicians can take care of the customers' special needs and come up with the Plate and Angle Rolling Solutions that best fit their requests.

Exos Aerospace is a privately-owned space hardware and operations company that is currently booking launches to space aboard our reusable Orbital and Suborbital family of vehicles. Exos Aerospace is one of four companies in the world to have flown a reusable rocket four times and one of only three FAA licensed entities flying a reusable Launch Vehicle. Exos stands amongst giants - Northrop Grumman in the 1990s executed with a cast of thousands, Blue Origin with ~3000+ employees, SpaceX with 6000+, and Exos with a team of ~ 20. Exos is expanding our business through our first National Charter Enterprise (NCE) in Italy with the manufacture of linerless Carbon composite Hydrogen tanks and research and development support of our Jaguar Air Launch To Orbit System (ALTOS). Exos is currently developing the Jaguar ALTOS (Air Launch To Orbit System) to loft 500kg to 500km (Target for 2025). Exos Aerospace is making SPACE available...

## M.B. SERVIZI & TRASPORTI

In over 40 years of activity we have produced solutions able to distinguish ourselves from our competitors, thanks to a systematic and strategic coordination of the company functions, both in performance related to the various types of transport all over the world, and in the expertise gained on customs legislation. Working together with our agents, present in the main foreign countries, we have identified the needs and priorities of each individual sector in which we operate: high-tech space, satellites, space launchers. With the aim of constantly improving our performance, we ensure effective assistance in the most important ports and airports, guaranteeing, where needed, routes reserved for goods that require special attention. Transport is a piece of a complex system of decision-making and logistics processes involving a plurality of actors. With our experience and expertise, we are at the side of our customers with a single goal, their full satisfaction.

## SOMACIS

### ITA

Via Jesina, 17
