METALMECCANICAMODERNA

M3 MetalMeccanica Moderna is a manufacturing company with a vast experience in the production of attachments for earthmoving machinery. M3 has invented and patented the first CONCRETE MIXER BUCKET in the WORLD. Furthermore, M3 has developed through the years a complete range of attachments for skid-loaders, excavators, telehandlers and loaders, including broom buckets - flail heads/shredders for skid loaders and excavators - graders blades with laser control systems - Levelling box dozer blade with laser control system - Dozer and tilt dozer blades - ISO 24410 Adaptor - industrial grapple buckets - fork carriers - snow blades - quick-hitches.

NERON PUMPS

Neron Pumps manufactures a unique patented high-pressure washer. The pumps are powerful, compact, self-priming, can be installed easily in any position, have integrated hydraulic motors, unloader built, direct flow, and are provided with all safety devices. The pumps can be used with any liquid, fresh water, salt water, glycol, or methanol in any mobile application, even subsea, from low pressure like dust suppression, high pressure for cleaning operations and heavy duty application up to 800 bar.

INDUSTRIAL LIFT

Industrial Lift systems find application in different sectors, including precast, oil&gas and tunneling. Customised Industrial Lift machines are able to satisfy multiple operators needs: gantry cranes guarantee lifting and handling of heavy loads through specific hooks and supports; self-propelled trailers, equipped with grip accessories to ensure optimal maneuverability, enable material transport in safety.

MINITOP

Minitop is a company specialised in the worldwide distribution of rubber tracks for construction and earth-moving machinery for over 28 years. As specialists in the rubber track industry, Minitop is constantly striving to improve its products to keep up with advances in machine technology. Thanks to its experience, passion and innovation, Minitop has patented a brand new project: TRACKSFORMER, the innovative system which increases the performance of your tracked skid loader anywhere, anytime. The tracks can change according to your working needs thanks to 4 types of tools, one specific to each work environment: Snow, Work site, Asphalt and Underwood.

REMdevice

Next Generation Control

REM device

REM device manufacture safety industrial radio controls employed in different fields: construction, industry, factory automation, marine, forestry, logistic and transportation (railways and airports). We've been differentiating ourself since our foundation in 2003, thanks to a patented induction charging system that isolates all the components: no electronic is in contact with the outside. This greatly extends the life of devices and batteries: we are the only granting a 3-year warranty, including batteries. Among other features, we designed diagnostic tools to make installation and maintenance of our devices the easiest and the most reliable as possible.

CARMIX

Reliability, performance and uniqueness! For more than 45 years, METALGALANTE is specialized in the production of small, all-terrain mobile concrete mixing plants CARMIX, the ideal solution for the production of high-quality concrete at low cost on construction sites in 162 countries. This "unique" machine can easily be considered a small "mobile concrete plant" which loads and weighs all the aggregates (water included), mixes and distributes the concrete where and when desired. Thanks to its flexibility, CARMIX is chosen for all types of work: residential, industrial areas, low-income housing, road handling, tunnels, etc.

About Italian Trade Agency

ITA - Italian Trade Agency is the Governmental agency that helps the business development of Italian companies abroad and promotes the attraction of foreign investment in Italy. Its activities are part of the Official Mission of Italy to the United States and are supported by the Ministry of Foreign Affairs and International Cooperation. With a worldwide network of 79 offices in 65 countries (5 in USA), ITA provides information, assistance, consulting, promotion and training to Italian small and medium-sized businesses to assert the excellence of Made in Italy in the world.

About UNACEA

Unacea is the Italian association of construction equipment. Founded in 2010, it counts around 85 members and represents both manufacturing and importers companies of all types of equipment: earthmoving, road, concrete, drilling, attachments, and tower cranes, with a total turnover of 3.5 billion euros and an employment volume of 50 thousand workers including related activities. Unacea represents the Italian industry in Cece - the European federation of the sector.

About UCoMESA

UCoMESA - Italian Association of Construction Equipment Manufacturers created in 1951 within ANIMA (Federation of Italian Mechanical and Engineering industries associations), Ucomesa gathers the most qualified, major Italian manufacturers of construction equipment and machinery. Ucomesa is particularly focused on matters related to export and carries on either directly or in co-operation with ITA/ICE Agency promotional activity which includes participation in several trade fairs both in Italy and abroad.

About AISEM

AISEM (Italian Association of Lifting, Elevating and Handling Systems) was formed in 1992 from the merger of two entrepreneurial unions that had already been federated to ANIMA for more than forty years. The association brings together the best national entrepreneurs for the construction and distribution of material handling and lifting equipment, representing about 75% of the entire national production, of which about 40% is destined for export.

About ANIMA

ANIMA Confindustria Meccanica varia, founded on 14 February 1914, is the Confindustria system's industrial organization that represents companies operating in the mechanical engineering sector. The Federation is made up of 30 associations and product groups, and has over 1,000 member companies, more than 220,000 employees, representing the 58,3% of the Italian total export sales for Construction equipment, machines and other building products.
