

ITALIA ^{at}

OFFSHORE TECHNOLOGY CONFERENCE 2023

1-4 MAY 2023
NRG CENTER - HOUSTON, TEXAS, USA

ITA - Italian Trade Agency is the Governmental agency that supports the business development of Italian companies abroad and promotes the attraction of foreign investment in Italy.

With a motivated and modern organization and a widespread network of overseas offices, ITA provides information, assistance, consulting, promotion and training to Italian small and medium-sized businesses. Using the most modern multi-channel promotion and communication tools, it acts to assert the excellence of Made in Italy in the world.

Federazione ANIE, member of Confindustria, represents the Electrical Engineering and Electronic companies operating in Italy.

With over 1,400 member companies, the ANIE system supplies technologies for public and private infrastructures in strategic markets such as energy, transport, industry and building.

ANIE INDUSTRY FIGURES FOR 2020:

- 76 billion Euros of total turnover of which
- 56 billion Euros represented by the Electrical Engineering and Electronic Technologies
- 16 billion Euros represented by the General Contractor Industry
- 4 billion Euros represented by the Private Security Services

500,000 employees

4% intra-mural R&D expenditure on total turnover

ANIMA represents within Confindustria companies of the mechanical sector (224.000 employees, 52,02 billion Euro production and 57.0% export share - estimates 2021). Established in 1914, ANIMA numbers 31 associations and 1,000 companies active in the Macrosectors and technologies represented: energy production and oil & gas industry; logistics and handling; water and food; industry; building; personal security and safety; metallic products. Our companies are strongly committed to promoting the energy transition in their business and production processes. A working group dedicated to research and application of Hydrogen for Energy Production is also active within the Federation.

Technologies represented by ANIMA presently gather many excellent players of Oil&Gas, such as manufacturers of valves, pumps, turbines, actuators, welders, compressors, pressure equipment and many other components and also meters, erection of industrial plants, soundproofing systems, water treatment for industrial use and environment protection.

We are also well-known for flexibility and creativity, which at an industrial level means to be good at finding solutions to apparently impossible problems or extremely challenging. Our companies are thus real "Solution Providers" in their ambit.

FEDERTEC

Italian Federation of Mechatronic Technologies and Components for Fluid Power, Power Transmission, Smart Automation and Control of Industrial Products and Processes

FEDERTEC was born in 2019 from the merger of ASSIOT – Italian Transmission Elements and Gears Manufacturers Association - and ASSOFLUID – Italian Association of Manufacturing and Trading Companies in Fluid Power Equipment and Components.

The Federation has about 250 members which design and produce systems and components that have a strong impact in manufacturing sectors.

The industrial automation industry (with focus on mechatronic technologies) is one of the most significant economic sectors in Italy - where it is estimated to be worth over 40 billion Euro - and worldwide.

FEDERTEC's objectives are to coordinate, protect and promote the technical and economic interests of the industrial automation industry, focused on the convergence and fusion of the various technologies and directed to represent the entire Italian value chain worldwide.

The Federation carries out market surveys, promotes export of member companies by attending the most important international trade fairs, encourages training and provides targeted support and works alongside its members for the solution of technical and economic matters.

Ascot 
Energy Everywhere

ASCOT is an Italian manufacturing group operating internationally in the power energy sector mainly focused on the production of generating sets (diesel, LPG, NG), hybrid technologies & Power Plants, designed in accordance to customer specifications at varying climatic conditions. Originally established in 1986, Ascot has since expanded its presence in over 60 countries throughout Europe, Africa, Middle East, Asia, Latin America and the USA. The "Ascot brand" is associated worldwide with high quality and reliability, tailor-made generating sets, long-life products, hybrid technologies, and special power solutions.

Ascot's production is focused on Diesel, LPG & Natural Gas Generating Sets and on Hybrid Power Solutions for Telecom, Mobile Generators, Rural Areas, Civil & Industrial and Modular Power Plants, and it consists of three product lines: Eco-Powered energy solutions, Hybrid-Powered products and systems, and special Engine-Powered generators. Ascot strives to maintain the highest standards of quality, manufacturing all products in Italy using 100% Italian and European components, standards and superior equipment.

CEMP®

Flameproof
Motors

Established in 1954, CEMP was among the first companies in Italy to manufacture flameproof motors. Over the years, the product range has broadened introducing flameproof motors with brake, electric pumps for printing machines, flameproof motors for Group IIC gases and for mining. In 2014 Cemp has been acquired by Regal Rexnord Corporation. In almost seventy years of activity, it has supplied the market with more than a million units. They work in chemical, petrochemical, and pharmaceutical plants, in refineries, thermoelectric plants, mines, offshore oil platforms, oil pipelines, gas pipelines, on board ships, printing machines and other industrial environments; wherever it is necessary to prevent from explosions and fires due to gases, powders or inflammable liquids.

FOMAS GROUP

Via Martiri della Liberazione 17,
23875 Osnago (LC) - Italy
T: +39 039 99811
www.fomasgroup.com

Contact:

Magda Perez Gila
info@fomasgroup.com

FOMAS Group masters the science of metals by manufacturing open die forgings and seamless rolled rings in any type of steel and non-ferrous alloys. Always on the cutting-edge, the Group also supplies metal powders in Iron, Nickel, and Cobalt base alloys.

Its capabilities allow to supply components in different delivery conditions, from raw/heat treated to rough machined, from pre-cladded/cladded to coated, depending from the level of vertical integration required by the Customer.

Among the various markets served, FOMAS Group delivers components for offshore, subsea, and onshore Oil & Gas applications: pressure control, tubular connections, turbomachines, valves, structures, turbines (e.g. aeroderivative) and process equipment (reactor, heat exchanger).

FOMAS Group is organised to serve the Oil & Gas market by following a globally coordinated local approach. This means that our sales team is market driven, organized consistently with the Industrial market, so that it can be served from all the Group plants.

**Friction Materials and
Braking Systems**

IMA Srl has been working in the field of friction material for over 50 years, focusing on everything related to industrial brakes and clutches.

To meet the needs of each business category and specific applications we have developed 30 types of friction materials.

Thanks to our internal laboratory, we can realize every application according to the customer's drawing, and overhaul brake shoes, brake blocks, and sectors with the most suitable type of material.

We are specialized in the construction of industrial, hydraulic, or pneumatic brake calipers. Standard items: rolls, sheets, rings, pads, blocks, and many others.

All our items, standard or customized are suitable for various industrial applications such as oil & gas, Lifts & Elevators, mining, wind power, paper mills, steel mills, and many others.

We are pipe fittings manufacturer for several application fields, Oil & Gas, Power, Chemical, Petrochemical, Desalination and so on.

Production range:

Seamless & Welded Butt Welding Fittings and Flanges:

Elbows 180°, 90° and 45° Long/Short Radius, Equal/Reducing Tees, Equal/Reducing, Laterals, Equal/Reducing Crosses, Concentric/Eccentric Reducers, Caps and ellipsoidal dishes, Barred, Flow, Split and Y Tees, Flanges.

International manufacturing Standards:

ASME, MSS-SP, DIN, etc.

MATERIALS (Equivalents also according to DIN – BS – AFNOR – JIS – UNI – GOST):

Carbon steel : ASME A234 WPB – WPC;

Low temperature carbon steel and carbon-nickel steel: ASME A 420 WPL6 - WPL3;

High yield carbon steel: MSS-SP 75 WPHY 42-46-52-60-65-70;

Alloy steel: ASME A 234 WP1-12-11-22-5-9-91 and P92;

Austenitic Stainless steel: ASME A 403 WP304/316 (L) (H) (LN) (N), 316Ti, WP321 (H), WP347 (H);

Duplex, Super Duplex, 6Mo, Incoloy and Inconel.
