

SELVATICI SRL

Selvatici Srl is an Italian company, manufacturers of high tech agricultural implements for specialty crops since 1969. We are focused on machines for working the soil such as spading machines, post-hole diggers, hydraulic post hole diggers for excavators, rear scrapers and land levelers (with or without laser). Moreover, we produce aerators and sand spreaders specific for professional gardening for the maintenance of any kind of sport field in natural turf. New tools have recently been introduced in the range, such as spading machines for two-wheel tractors, stone buriers and bed formers and from last year forklift.
